

# TRUCK PAC™

BY BOOSTER PAC

## INDUSTRIAL GRADE

### ROTATING HOLSTERS

Allow easy removal and replacement of clamps.

### 12 VOLT POWER

Provides power to run accessories, with automatic circuit protection to eliminate overloads. (ES8000 = 24 Volt)

### HEAVY-DUTY CABLES

Extra-long, industrial gauge cables ensure safe power transfer and enable ideal unit placement during jump starting, even on large vehicles.

### HEAVY-DUTY CLAMPS

Industrial Grade Hot Jaw™ clamps with high tension springs penetrate corrosion on battery terminals and transfer maximum power to the vehicle's battery.

### AUTOMATIC CHARGING

The ease and convenience of automatic charging eliminates the possibility of overcharging.

### BATTERY STATUS LEDs

Provide a quick, at-a-glance snapshot of battery condition.

### IMPACT-RESISTANT

Heavy-duty case provides lasting protection, even in the roughest environments.

### PREMIUM BATTERIES

Truck PAC jump starters feature high performance, replaceable ES Series batteries, specifically developed for vehicle jump starting applications.

Working in the vicinity of a battery is dangerous — always wear protective eyewear!

REPLACEMENT BATTERY

CHARGER/CHARGER CORD

MALE-MALE 12V EXTENSION CORD

## TECH TIP

When connecting to vehicles with multiple starting batteries, always make the positive connection to the battery closest to the starter. This ensures that maximum power will reach the starter.

### ES6000

**3000 Peak Amp  
12 Volt Jump Starter**

Powered by twin high-performance **ES Series** batteries, the ES6000 delivers 3000 Peak Amps for heavy-duty starting in even the most difficult situations.

Its 54" cables and heavy-duty clamps allow ideal placement during jump starting while its automatic charging feature enables you to keep the unit in an always-ready state.

	ESA1

### ES8000

**1500 Peak Amp  
24 Volt Jump Starter**

This 24 Volt-dedicated unit is ideal for fleet operators, users of heavy-duty implements and agricultural settings.

This is the preferred **Truck PAC** model for users with frequent 24 Volt jump starting situations. Having a dedicated model for each starting system voltage (12V and 24V) saves time and simplifies repair operations.

### ES1224

**1500/3000 Peak Amp  
12/24 Volt Jump Starter**

The ultimate in versatility, the ES1224 switches from 12 Volt to 24 Volt mode with a simple turn of a knob.

Features our exclusive AWS – Advanced Warning System™, which alerts the operator to a variety of unsafe jump starting conditions with its audible warning buzzer.
