

# VIPER Fluid Systems Service Accessories

The new **VIPER Universal Flushing System, Part No. 982100**, delivers simple, thorough and economical component flushing. It is designed to flush debris and contaminants from vehicle system components during repair and maintenance applications. It is ideal for flushing components from a variety of vehicle systems:

- A/C condensers
- Oil coolers
- Heater Cores
- Power Steering coolers
- Transmission coolers

Powered by shop air, it features patented pulsating action to provide superior results over simple flushing. Use it to remove contaminants and debris whenever you have to access a vehicle system, enabling you to get the job done right the first time and reduce the chance of a comeback.

It is also an excellent degreasing tool for vehicle components or even the underside of the vehicle.

The 1-gallon capacity system works with most any flushing solution, is simple to use and includes easy-to-follow instructions. Connecting to vehicle components is easy because the flusher comes complete with three different adapter tips for compatibility with the widest range of components. It features a 100 PSI ASTME Safety Pop-Off Valve and a Safety Gun Trigger Lock for safe operation. The kit includes a flush storage container, flush gun, 3 adapter tips, return hose and used flush collection pail. The entire kit fits into the used flush collection pail for safe, secure storage and features a 1 Year Limited Warranty.

Ideal for flushing A/C condensers, heater cores, oil coolers, and more!

With 3 adapter tips, it is easy to interface with system components.

The convenient return hose allows easy management of used flush.

Innovation from the Company that Brings You the Brands You Know.
