

# SOLAR<sup>®</sup>

## OCTANE SERIES

### RUGGED CLAMPS

Rugged, Industrial Grade clamps provide strong battery connections and efficient power transfer.

### COMFORT-WALK™ HANDLE

Shop mobility is a snap with the Comfort-Walk handle. Its contoured design provides balance and control in the service bay.

### EZ VIEW™ CONTROL PANEL

Monitoring service progress is quick and easy with the angled EZ View Control Panel. Featuring large gauges and selector knobs, **SOLAR Octane Series** wheel chargers are easily viewed from a distance during service.

### VERSA-TREX™ WHEELS

Large wheels mounted on sturdy steel axles and a narrow profile make moving **SOLAR Octane Series** wheel chargers a breeze on any type of surface, even in tight spaces.

### SHIPS FULLY ASSEMBLED

Each unit in the **SOLAR Octane Series** wheel charger line is shipped fully assembled — saving time and effort right from the start.

### QUAD FORCE™ RECTIFIER

The new Quad Force Rectifier design meets the demands of daily professional use.

### TRANSOID™ TRANSFORMER

Our exclusive **SOLAR Transoid** transformer design delivers breakthrough battery charging performance and efficiency.

Lower operating temperatures, lower power consumption and longer unit life are just a few benefits of the new design.

Working in the vicinity of a battery is dangerous — always wear protective eyewear!

## TECH TIP

For the best results when boosting a battery, charge the battery for 5-10 minutes at the appropriate charge rate for that size battery. Then, turn the rate selector to start and attempt to boost the vehicle.

### OS6110

#### **40/15/2/200 Amp 12 Volt Charger with Engine Starter**

The **SOLAR** OS6110 offers professional 12 Volt charging power in an economical unit, plus the convenience of 200 Amp engine starting assistance.

### OS6120

#### **40/15/2/200 Amp 6/12 Volt Charger/Starter/Tester**

With multiple 12 Volt charging rates and 200 12 Volt engine starting amps, the **SOLAR** OS6120 meets a wide variety of shop needs. A 2 hour timer provides improved charging safety and convenience, while a test function provides a snapshot of battery function and alternator output.

### OS6130

#### **60/40/2/250 Amp 6/12 Volt Charger/Starter/Tester**

Our most popular model features multiple charging rates up to 60 Amps and 250 Amps of 12 Volt engine starting assistance. A 2 hour timer provides improved charging safety and convenience, while a test function provides a snapshot of battery function and alternator output.

### OS6140

#### **60 Amp 6/12 Volt Charger/Starter/Tester with Automode**

The ultimate in versatility and convenience, it features infinite adjustable charge rates to 60 Amps, an automatic 12 Volt charging mode, 250 Amps of engine starting assistance and a test function to provide a snapshot of battery function and alternator output.

### OS6150

#### **60 Amp 6/12/24 Volt Fleet Charger with Engine Starter**

With multiple charging rates at three voltage settings, the **SOLAR** OS6150 delivers professional charging power to a wide variety of vehicles. A 2 hour timer delivers improved charging safety and convenience.
