

SOLAR[®]

BENCH CHARGERS

PROTECTIVE CASE

Black matte steel cases provide protection in today's harsh shop environment.

POLARITY PROTECTION

Indicator provides a warning if the unit has been improperly connected to the vehicle (automatic models).

MAINTENANCE MODE/ TRICKLE CHARGERS

- Three models from which to choose.
- Fixed mounting kits available with some models.
- Automatic operation for worry-free charging (some models).

OVERLOAD PROTECTION

Automatic-reset circuit breaker technology protects against overloads.

EASY, INTUITIVE OPERATION

Simple control panel design and intuitive settings make for easy operation.

TRANSOID™ TRANSFORMER

The exclusive **SOLAR Transoid** transformer design delivers breakthrough battery charging performance and efficiency. Lower operating temperatures, lower power consumption and longer unit life are just a few benefits of the new design.

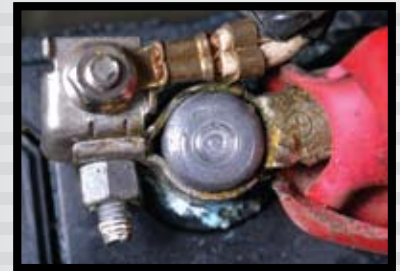

Working in the vicinity of a battery is dangerous — always wear protective eyewear!

TECH TIP

Never spark charger leads together as a way of determining that you have power to the charger. Once the charger is properly connected to a battery, the charger's ammeter will indicate the charging process has begun.

Maintenance Chargers

TD1000 **1 Amp Automatic** **12 Volt Battery Charger**

Automatic operation makes this unit excellent for maintenance of a variety of vehicle batteries and for use in charging jump starters. This versatile model can also be used to charge a jump starter through the power port.

1001 **1 Amp Manual** **6/12 Volt Battery Charger**

Ideal for use on motorcycles, snowmobiles, lawn mowers and a variety of vehicles with small batteries. A durable plastic case and simple design make this an easy-to-use, economical charger.

1002 **1.5 Amp Underhood 12 Volt** **Automatic Battery Charger**

With underhood mounting and automatic operation, the **SOLAR 1002** brings convenience to the task of keeping seasonal-use batteries in top condition. Includes battery mounting kit.

Manual Chargers

1007C **6/2 Amp Manual** **6/12 Volt Battery Charger**

With 6 and 12 Volt operation and multiple 12 Volt charge rates, the 1007C provides charging versatility in an economical unit. Like all **SOLAR** battery chargers, it is UL-approved and ships ready-to-use.

1010C **10/2 Amp Manual** **6/12 Volt Battery Charger**

The 1010C is an excellent full-power unit for charging a variety of battery types, including standard, maintenance-free and small engine batteries.

1050C **10/2/55 Amp Manual** **6/12 Volt Battery Charger**

In addition to being a great full-power charger, the 1050C adds the ability to provide 55 Amps of engine starting assistance. Features 6 and 12 Volt operation and multiple 12 Volt charge rates.

Automatic Chargers

1014C **10/2 Amp Automatic** **6/12 Volt Battery Charger**

The 1014C features automatic operation in 12 Volt mode. It automatically stops charging as the battery reaches full charge and resumes charging if the battery discharges for any reason.

1060C **10/2/55 Amp Automatic** **6/12 Volt Battery Charger**

Fully automatic operation, multiple 12 Volt charge rates, 55 Amps of engine starting assistance...it is the go-to bench charger for today's shop. Features our exclusive **Transoid** charging technology for superior charging efficiency.

1160C **15/2/100 Amp Automatic** **6/12 Volt Battery Charger**

The 1160C packs 50% more charging and starting power than most portable chargers, plus automatic operation to shut off at full charge, turning the unit back on if the battery discharges for any reason.
